DuroTM
Power
AUTOMOTIVE BATTERY

Duro Batteries

Duro Batteries, Automotive & Motor Cycle Batteries are designed to meet long life along with the demanding high power requirement. These Batteries provide reliable start at all weather conditions. Duro Batteries are low maintenance type conforming to Japanese industrial Standards JIS D 5301.

Features & Benefits

- Special Grid Alloy
- Glass Mat bonded Separator
- Resistance Weld joints
- Dual Plate separation
- Factory Charged battery
- Resistance to corrosion & Less water top-Up
- Avoids Active Material Shedding leading to long life
- Ensures Reliable cranks
- Protection against Shocks and vibrations
- Ready to Use.

Battery Models & Technical Details

BATTERY MODEL (12 V)	CAPACITY AT 20HR (AH)	DIMENSIONS (MM)			FILLED WEIGHT +/- 5%	CHARGING CURRENT
		L	W	H		
40B24 R/L	35	197	129	227	10.7	3.5
D700 /L	65	260	172	216	18.7	6.5
D800	80	305	173	223	23	8.0
D88	88	410	176	223	26	9.0
D100	100	410	176	223	27.7	10.0
D130	130	505	182	257	35.7	13.0
D150	150	508	222	257	41.5	15.0
D180	180	521	278	270	55.1	18.0
D200	200	521	278	270	56.7	20.0
